

## ***International standards for the techno-economic study of lithic productions in the Neolithic - a road to harmonization***

Funded by the French-German University

### **Workshop 1: Identifying our research traditions' complementarity and specific features: a practical exercise – 19<sup>th</sup> February 2024, Cologne (Germany)**

The pedagogical objective of this workshop will be to make the students/young researchers aware of the diversity of approaches regarding lithic studies and their complementarity while encouraging them to open up and engage in a European dialogue. After preparation based on the study of an archaeological collection following the French research tradition (technological approach) and the German research tradition (SAP system), the proposed workshop will compare the two approaches.

#### **Schedule:**

9h-11h – Results of the analysis of the archaeological collection according to the two analysis methods (SAP versus technological analysis)

11h-13h – Observation of analysis criteria on archaeological material

14h30-17h – Set up 4 thematic working groups (raw materials, production methods, tools, databases): identify the complementary and specific features of each tradition. Restitution of the work through short presentations

#### **Teaching and scientific team**

- Silviane Scharl, Cologne University
- Birgit Gehlen, Cologne University
- Ingrid Koch, Cologne University
- Solène Denis, CNRS UMR 8068 TEMPS
- Pierre Allard, CNRS UMR 8068 TEMPS

#### **Modalities**

This workshop is open to 12 Master's students, PhDs or post-docs. The project will pay for transportation and accommodation. Applications with motivation letters must be sent to [ufa.cologneparis@gmail.com](mailto:ufa.cologneparis@gmail.com) before the 8<sup>th</sup> of January 2024. For any questions, contact [solene.denis@cnrs.fr](mailto:solene.denis@cnrs.fr)
